Many Fast Horses Training at
Edmonton for the Spring Meet

Over Fifty Racing Animals Are Conditioning for the Racing Season at the Grounds of the Exhibition Association. Some Famous Horses Who Will Enter at Spring Meet

TRACK IS IN PERFECT SHAPE SAYS
HORSEMAN WHO IS ON GROUNDS

MORE THAN FORTY HARNESS HORSES AND ABOUT EIGHTEEN RUNNERS ARE IN THE STABLES WORKING OUT EVERY DAY.

The horses out at the track have only a couple of weeks to finish their training for the Edmonton Spring race meet which is to be held on May 24 and 25. The splendid track and weather conditions have enabled them to work down to a fine point and they are pacing and trotting out some good marks right now. Many more horses than were expected by the association are training at Edmonton, the bad stables and dead track at Calgary having caused many to desert that town for the better accommodations at Edmonton.

The track is in perfect condition. Properly graded and drained it has a fine springy bed on which the horses should make the fastest time they are capable of running. Last year the bed was in good shape but with a year in which to settle it is almost perfect. The trainers are unanimous in the statement that the track is without doubt the best half mile track in Canada and that there are very few on the American continent that equal it.

There are over forty harness horses on the grounds and about a dozen running animals with as many more to come within the next few days. Among those which will arrive this week is the Wisconsin stable of about 20 horses owned by Messrs. Owens and Stanford. J. Mathewson's stable of the should be here today and a number of others in the early part of the week.

Of the 56 or 57 horses at the track now about forty-five are harness animals and 14 or 15 running horses. These that have made the fastest marks are Claude R. 2:12½, and Captain Darty 2:07.

The stables which are training in Edmonton are The Wheat City stable under the management of T. Cummings, The Ireland stable, the Dempsey string, the McKesney stable and the Dwyer stables and others.

In the Wheat City stable are Prince Rupert and Baroness Dixon, both known to Edmonton tracks, and both owned by Mr. Cummings himself. Smith Bowman, Alberta Roy, Ivanhoe, and Eye Eye, Lady Mew will arrive in a few days. Mr. Cummings' unit a week ago has been training at Calgary but the dead clay track which the association has there was endangering the feet of the horses and he moved to Edmonton with his string.

In the stable of J. Dempsey, of Prince Albert are Claude R. 2:12½, King Parole, 2:18½, Ella Norther, 2:14, and seven green pacers and trotters.

McKesney, a local owner, has five animals on the track, Red Ball with a record of 2:13½, Palawa, 2:26½, Sombra Lady, 2:22½, and Sombra Bird. Except Palawa and Sombra Bird these horses are well known to local horsemen. They are fast horses and steady.

Mr. Ireland, owner of the Ireland stables has six horses in his string. Little Tim 2:13½, Brown Spot, 2:21½,

J.M.C. 2:37½, Will Onward, a green trotter, who is one of the best bred horses in the west, bred by Senator Wilkes, at Lexington, Kentucky, and sired by Onward, this horse is expected to make a clean sweep of the green races and perhaps make some records. Wellington D. is another green trotter in the Ireland stable.

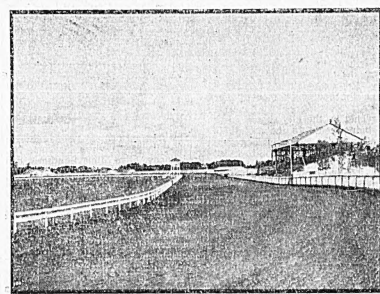

P. O. Dwyer has three horses in shape for the races. Captain Darty with a mark of 2:07 and two green horses.

Bob Brown has five head in his

also a prize winner at stock shows. Aunt Aggie, a stake mare, by Imported Magnan, Jeanie Imported Aggie Marlow. As a two year old this mare won the Woodland stakes at San Aneta running the half mile in 36 2-3, and has got more of the great Ormond blood in her than any horse in America, having got it from both sides.

With a track in perfect shape fast horses, plenty of entries to make things interesting and close contests the track should be the most successful of the year.

Bob Brown has five head in his

HOME STRETCH OF TRACK ON EDMONTON EXHIBITION ASSOCIATION'S GROUNDS WHERE THE SPRING RACE WILL BE HELD ON MAY 24 AND 25.

string: Dolly Bell with a mark of 2:23½ and four green ones.

W. J. Porter will enter Dr. Sleuon

John Mathewson will have five horses. Three green pacers, a free for all and a hunter.

The Owens and Stanford stable consists of eighteen horses, ten to be imported by Mr. Stanford and eight to Mr. Owens.

The Allan stable are all running horses. Bernardo, six years old, by Imported Cactus II out of Auto Harp, by Imported Esther. Point Lace, a five year old brown mare, and Six Shinder, owned by Walter Spierle of Edmonton, Dame Remembrance. This horse made its fastest time on the 1½ mile London, Kentucky, in 1:53. Barrie, a three year old by Canard, Dame Bous, by Imported Greighton, ran in the international circuit last year, but has recently won a high stepping trotting gelding by Constantine to exhibit at the international horse show in London, England.

The Rochester team, champions of the Eastern League, are right out in front and looking for another pennant.

Bob Criss, of the Browns is a better horse than the Browns. He has been worked in the last two races this season and lost both of them.

THE PARIS MUTUELS.

They seem to be well satisfied with the pari-mutuels at the Lexington track. The machines are to be tried out on the Pacific coast this summer also, and promise in a very short time to supersede the "bookie" altogether. The Toronto public will be the first in Canada to see the machines in action when the spring meeting at the Woodbine opens the last of this month. The machines should at least do away to some extent with the class of race track followers known as "bookies," and should help to put the game on a higher footing.

Constantine (2:12½), that stood for stock purposes for a time in New England, is a sire of slow race performers as well as race winners. It is announced that Alfred G. Vanderbilt has recently bought a high stepping trotting gelding by Constantine to exhibit at the international horse show in London, England.

The Rochester team, champions of the Eastern League, are right out in front and looking for another pennant.

Bob Criss, of the Browns is a better horse than the Browns. He has been worked in the last two races this season and lost both of them.

THE STAKE ENTRIES

Entries for the stake race will close on Monday and will be released for publication in the dope sheet of the Edmonton Capital next Saturday by the Edmonton Exhibition Association. The entry list promises to be much larger this year than in any previous year of the association. Watch the Capital next Saturday for the entries complete.

EYES ON KENTUCKY DERBY

Louisville, Ky., May 13. The greatest racing event on the Western turf is being decided this afternoon at Churchill Downs, when the thirty-seventh annual renewal of the classic Kentucky Derby is being decided. The vent marks the opening of the spring meeting of the New Louisville Jockey club. In view of the discouraging condition surrounding the sport of kings in most parts of the country the keen interest that is manifested in the Louisville meeting this year and particularly in the Derby is regarded as somewhat remarkable. It is estimated that more than 20,000 people are on hand to witness the great event today.

From present indications it is not likely that more than five or six horses will start in the Derby. What the field lacks in quantity, however, will be made up in quality. Round the World, the sensational filly from the South, Gray and Meridian are regarded as sure starters. Round the World continues a favorite in the betting. The Derby has never been won by a filly though many have entered for it, and some turfmen are of the opinion that Round the World will weaken under the strain of the mile and a quarter race. The number of followers of the track, horsemen and spectators that has assembled to witness this greatest of American races, has never been equalled in the history of Kentucky racing. The interest in the contest is at the highest and immense sums are being wagered on the result. It is estimated that \$500,000 will change hands.

The spring harness meeting at Osawa, May 24 and 25, is assured of success. A great list of entries is the word from the popular secretary, Dr. E. K. Koenig. First day 2:25 pace and 2:30 trot, second day 2:30 trot and free for all. All purses \$300. If the weather conditions are favorable there will no doubt be a record attendance of both people and horses.

Reports from Denver, Col., indicate that Gus and Nancy Macey have Gen. H. Eastbrook's stable of horses in the condition. The record horses are Spanish Dancer (2:07), Country Jay 2:05½, Gold Dollar (2:09½), Aroo (2:14), Nancy Gentry (2:29½), Hall Bird (2:1), 2:29½, and the pacers G. The Limit (2:06½), and Countess Marie (3) (2:14½). In the green division of trotters are Panny Lawson (5) by Treacette (2:09½), Lady Jacquita (3) by Jay McGregor (2:07½), McKesney Mack (2), yearling record of 2:27½, by McKesney (2:11½), Hydranta, three-year-old filly, and Baplin, three-year-old colt. Macey is very much taken up with McKesney Mack. The youngster sloped the last eighth of a mile in 16 seconds. Old Country Jay is in the fettle, and they are providing that he will be even more of a surprise this season than he was last.

A net profit exceeding \$86,000 was made from the Minnesota state fair at Hamline last year, if reports are correct. Although the total cash receipts from all sources exceeded the disbursements by about \$300,000. That is what the harness horse races do for state fairs.

SPECTACULAR PLUNGES ENDED
WITH PARI MUTUAL MACHINES

The Introduction of the New Betting System Puts an End to the Oldtime HeavyS lashes in Betting-Ring

BIG RACE TRACKS ARE BEING
DEMORALIZED BY CHANGE

SOME STORIES OF THE TRACK—HOW THE OLD TIMERS RISKED FORTUNE ON THE STEP OF A PONY WITHOUT TURNING A LASH.

(By John Hiden, former secretary N.Y. State Racing Commission.)

With the coming of pari-mutuel machines on the great race tracks into such general use the day of the spectacular plunger has passed temporarily. The volume of general betting will remain practically as it was, but there will be the absence in the public eye of the daring man, the boldness and magnitude of whose operations frequently dwarfed interest in races themselves. Singular it was that a very spectacular event happening which ad-

Moral or not, and corrective or otherwise, the day of the man who bet his thousands in public is gone. There is no longer the intense excitement both among the bookmakers and public to see how, and in what volume any individual would wager; no more that hesitancy which awaited a lead for speculation. There is no boulevard for the limousine and the unbridled; no operator whose fortunes might decide as to the course which the general current might take.

Years ago, it was Michael P. Dwyer, who was the balance wheel of the market, a man, reticent and self-contained, and probably the greatest of all the speculators on the American turf. Only once was he in any way disturbed over any wager. That was when he made the highest bet of which there is any authentic record in the history of the American turf.

It was the afternoon of the day when the horse, Joe Cotton, came in partnership with his brother, Philip F. Dwyer, was entered in the Grand National Handicap at Sheepshead Bay.

The first three races had been disastrous to him, and while he had abundance of assets, they were not what might be termed quick assets; that is, they could not be readily disposed of without sacrifice.

His brother had an abundance of ready money, but his brother, while a partner in the stable, was not a partner in the betting. He discontinued watering. Of course it would never do to permit the ring to have an inkling that Michael was short of ready money for he was its most formidable enemy, and it would crush him remorselessly.

"Smiling Johnny" Kelly at that time was the betting commissioner, and Mr. Dwyer told him to go into the race and get enough on Joe Cotton to square the account, which was a debt of \$16,000. Kelly went, out into the race, saw "he odds," which were 2 to 5, and returned, again, to Mr. Dwyer. He had not bet a cent.

Dwyer looked at the odds and mere-

(Continued on Page Three.)

THE KIND OF HORSES BRED IN EDMONTON DISTRICT—SOME MEMBERS OF THE EDMONTON POLO CLUB AND THEIR PONIES.

Ald. Sam Melville's Lady Brant (2:23½), is being jockeyed regularly. She is a grand type of mare. She got her mark last summer at Montreal, when she was practically green. She was raced some this winter, but did not seem to take to the ice footing. She will no doubt be paced this summer.

There was always something of sentimental enthusiasm in the men who wagered tens of thousands of dollars on a race that occupied but a minute or even less in its decision.

The Big Racing Meet at Edmonton
MAY 24 AND 25 AT 2 P.M.
The BIGGEST SPRING MEET Ever Held in Alberta

"Eat and Be Merry!"

Stop starving yourself—stop suffering the pangs of indigestion—stop worrying about what you dare and dare not eat.
Eat hearty meals of wholesome food, take

HA-DRU-CO DYSPEPSIA TABLETS

and you'll feel like a new person. Sour stomach—heartburn—occasional indigestion—chronic dyspepsia—all yield quickly to HA-DRU-CO Dyspepsia Tablets. The properly digested food restores your strength, your stomach regains its tone, and soon requires no further aid.

50c. a box. If your druggist has not stocked them yet send 50c. and we will mail them.

NATIONAL DRUG AND CHEMICAL CO. OF CANADA LIMITED, MONTREAL.

SPECTACULAR PLUNGE ENDED WITH PARI-MUTUAL MACHINES

(Continued from Page Two.)

ly remarked: "The commission goes, Johnny." And Kelly went back and wagered \$10,000 to \$16,000. Mike Dwyer then did what he had never before, and what he never afterwards did, he made it a rule never to permit his trainer or his jockey to know whether he had a dollar bet on the chances of his own or any other horse in a race.

But this time there was the \$16,000 debit balance and the new wager of \$10,000—\$26,000 in all that had to be met in cash before the first race of the following day if Joe Cotton lost—and he called Jimmy McLaughlin, the jockey aide and quietly told him to be careful not to make any mistake.

McLaughlin didn't make any mistake. He won, but it was only by a nose, and in winning he had to break a record. He could tell from Dwyer's face that he had had a cent of interest in the event.

This is the largest individual wager by any man on any single race in the country of which there is any authentic record. Dwyer, himself, and a half score more have stood to win far more than was the paltry \$16,000, and have, in fact, won the wagers, but his \$26,000 bet is without parallel. He stood that \$26,000 possible loss without the flinching of an eye. Enthusiasts who saw him later in their country on his ill-starred trip when his fortune rushed from him in golden streams, paid tribute to his apparent indifference.

EIGHTEEN YEARS THE STANDARD prescribed and recommended by physicians, a scientifically prepared remedy for women. The result from their use is quick and permanent. For sale at all drug stores.

ALL HARMONY IN BUILDING TRADES

RELATIONS BETWEEN EMPLOYERS AND EMPLOYEES NOT STRAINED IN THE LEAST

The local labor situation remains practically unchanged so far as relations between the employers and employees in the building trades are concerned.

Up to the present time the contractors have made no effort to put non-union men to work anywhere in the city.

As long as this condition of affairs continues the union men say there will be no friction and the season's work move along harmoniously.

Meanwhile the contractors are saying nothing and saving some wood.

John Covelick, a brother of the famous "great killer," has signed with the San Antonio Texas team. He is an outfielder.

Captain Charles McLaughlin of the Harvard team is a clever ball player. He can play any position on the nine, even to pitching.

Trainmen Share the Increase in Wages

President Lee of the National Brotherhood Makes Report to Convention in Harrisburg, Pa. This Week

Wages of trainmen in Canada and the United States have been increased \$37,000,000 in a year, according to the report made to the Brotherhood of Railway Trainmen by W. H. Lee, president of the brotherhood. The organization has been holding its annual convention this week at Harrisburg, Pa. The report of President Lee was the first statement to be made of the wage increasing movement in 1910 and covered every section of the country.

The president's report reviewed various matters occurring last year, including the trouble with the Pennsylvania railroad, and advocated that safety devices be more liberally supplied. Attention was also called to the importance of the workmen's compensation act, and the progress of legislation in various states was reviewed.

Wages on the Up Grade and Hours on the Toboggan

Winnipeg, May 13.—Comparative statistics of wages in Winnipeg for this year, and two and twelve years ago, show generally an increase in the scales paid to the various trades. Numerous occupations listed this year are not found in the official figures of former years issued by the labor department at Ottawa.

Comparative figures were secured whenever available from the government reports, which in turn are compiled from trades union records and other reliable sources.

In a dozen or more occupations substantial increases are found, while in none is a decrease recorded. In stating last year's wage scale the minimum has been set out. While carpenters are listed at 40 cents an hour, the current figures of this class is 12 cents an hour. The same condition obtained in 1909, although the department record states 45 cents as the rate per hour in that year.

The demand for men for work of every description, from information secured from employers, is just being met by the tremendous influx of immigrants from all countries. Present conditions appear to indicate that there will be work for everyone in every trade or work, and that there will be enough to do the value of work projects for this year.

Trade or Class of Labor	1911	1910	1909	1908
Bricklayers	62 1/2	8	50	50
Carpenters	40	8	45	36

Street railway men	23-20	9	18.00	14.00
Tailors	81.75
Railway construction laborers	\$1.75 day.
Locomotive engineers	from \$1.40 to \$5.30 per 100 miles.
Truckmen	average \$2.85 per hundred miles in Manitoba.
Locomotive firemen	sliding scale, according to length of service.
Farm hands	experienced, \$25 to \$40 per month. 1909, \$25 to \$35 a month.
Inexperienced farm labor	\$20 per month.
Cigar makers	\$15 per week minimum, 9 hours per day. Piece work, 1909, \$15 per week.

IN THE WORLD OF LABOR

The Vancouver Labor Temple Company, Ltd., last week secured an inter-city injunction against the Norton-Griffiths Steel Construction Co., restraining it from employing non-union carpenters upon the construction of the new labor temple. Mr. Nicholson, who is supposed to be looking after

the interests of the construction company, is also chairman of the "master" builders' exchange, and the contract was violated in order to force the construction of the labor temple. But as equals are equal before the law the contemptible action was headed off upon appeal to Chief Justice Hunter in the supreme court.

The bituminous miners on strike in the Gow's Nest Valley are taking things very philosophically; so much so that the coal barons are at a loss to understand their attitude.

The organization of a provincial Federation of Labor in Ontario now seems probable. What is known as the Labor-Combination League of Ontario will convene in Guelph on May 24. Union officials and the labor press are urging all the unions to send delegates to the convention, when the advisability of forming a Provincial Federation will be thoroughly discussed. Phil Obermeyer says that "if the federation finds a sentiment largely in favor of the plan, arrangements will be made to call an extra convention of labor representatives at a later date at which steps will be taken to set the federation going. The expression of opinion sought at this juncture does not commit labor to any financial responsibility. That matter will be taken up later, and everybody will be given a say in what they shall consist of. If the members think that the unions of the province should come together once a year to discuss and decide on what they require, now is the time to make their convictions known."

"The man who does nothing himself is never at a loss when it comes to advising others what to do."

The average cost of living in the United States has gone up 60 per cent. within the last few years. Wages have risen 15 per cent.—Charles Edward Russell.

Strikes involving nearly 1,000,000 garment workers in all parts of the United States, it is said, will be called in August if garment manufacturers do not accede to the demands for better conditions for employment, which will be made at that time.

The royal commission on tuberculosis for Quebec province, in presenting its report, recommended that an inquiry should be made into the hours and conditions of the worker. After their careful dealings with the subject, they have arrived at the conclusion that the heaviest grudge against this disease is the workers' conditions, is very apparent, and to treat this subject in a satisfactory form, conditions must be noted and improved.—Wm. Lodge, Ottawa Free Press.

Scotland has a superannuation act, which provides pensions for its school

COMMISSIONERS HOLD MEETING

The license commissioners are holding their annual meeting at different points in the province this month. The applications for renewal of licenses are being considered.

At the meeting of the commissioners at Wetaskiwin all the applications were recommended for the city of Wetaskiwin and the towns on the Wetaskiwin branch.

At the next Deer meeting on May 25th, the application of Charles LeBlond of the Imperial Hotel, Blackfalds, was adjourned till the meeting at Calgary, May 17th. The other nine applications were all recommended.

At the meeting of the commissioners at Okla, the application of the Dalsbury Hotel Co. for license and renewal was adjourned till the meeting at Calgary on May 17th. The application of J. W. Brock for a new license for the Queen's Hotel, Manson, was refused.

All the other applications for licenses in the Okla district were recommended.

At the meeting at Calgary the licenses for the Calgary license district were considered. The application of Fred J. Hargrave for a transfer at Midnapore was refused because the commissioners deemed it was not required for public convenience.

The application of Ed. Johnson of the Royal Hotel, Okotoks, for transfer and renewal of license was recommended for six months only.

The application of Thos. A. Harfield of the Alberta Hotel, High River, was not recommended owing to unsatisfactory condition of premises and conduct.

The following applications were adjourned till the meeting at Calgary on May 17th: The application of J. H. Hargrave of High River; The High River Hotel Co. for a wholesale license at High River; Geo. H. Lloyd of the King Edward Hotel, Stratford.

All the rest of the applications for licenses in the Calgary district were recommended. The applications for licenses in Calgary city will be considered on Wednesday, May 17th, at Calgary.

The maximum benefit is to be half the average annual salary for the last five years.

The provincial federation idea is furnishing food for serious thought in the Okanagan valley. The Eastern Labor News has invited trade unionists in the district to use its columns for a discussion of the topic.—Phil Obermeyer, Boston Herald.

San Francisco Labor Council has had \$35,000 as its initial payment on a plan on which to construct a hotel, temple, more in keeping with present needs and requirements.

The Okanagan Advertiser, published by S. Lohman and J. H. Mohr, at Armstrong, B.C., now floats the little joker at the head of its editorial pages.

It is estimated that the plan to promote the silk industry is to be established in Italy.

Seventy labor unions have become affiliated with the California State Federation of Labor since last October.

Every fourth woman in New York City is a wage earner. Of this number only 47 per cent earn more than \$5 a week.

In the state of Washington the compensation act will go into effect October 1st and the woman's eight-hour work-day on June 10.

The maintenance of way men of the Canadian Northern Railway have been granted an increase in their pay amounting to 14 per cent.

In the paper making industry of France nearly 82 per cent of the masters are organized, as against only 21 per cent of the employees.

The International Iron Molders' Union now has an approximate membership of fifty thousand. Three new unions were added during last month.

It is reported that one thousand mill men joined the United Brotherhood of Carpenters and Joiners within two weeks recently at Oskosh, Wis.

For Skin Diseases

A Treatment That Cures Nothing Unless It Provides Satisfactory Relief.

We have a genuine white ointment with a pleasant odor that is clean to use, which we believe is the best known remedy for the relief of skin diseases. It is especially efficacious for overcoming eczema, all its various forms, ring worm, acne, pimples, blotches, insect bites, tetter, certain forms of ulcers, sores and wounds. It is strongly antiseptic, cleansing, soothing and healing. It stops all itching and burning caused by skin eruptions. We are so positive of this ointment's superiority that we offer it with the distinct understanding that if after having given it a reasonable trial, you have not got to tell us and we will, without quibbling, return every cent paid us for it. We exact no promises or obligations whatever.

You want to try Frazz's Eczema Ointment. The first application gives a refreshing sense of relief, and because of its germ destroying power, it causes of its germ destroying power, it causes eczema and many other eruptions. It is particularly active in relieving the itching peculiar to children.

You certainly cannot lose anything by trying it. We would not dare make this offer except we are positive that Frazz's Eczema Ointment will satisfactorily benefit you. Two sizes, 50c. and \$1.00. Remember, your trial is absolutely free. Write to the Rexall Store, A. Archibald.

Dr. de Vries's Female Pills. A reliable French regulator; never fails. It is a safe, effective, and gentle purgative of the female system. Refuse cheap imitations. Dr. de Vries's Female Pills, a box or three for \$10. Mailed to any address.

Quite Entitled to Take Defensive If Better Satisfied

Sir Wilfrid Laurier has named the committee which will investigate Frank Oliver.

One of the questions which the investigation committee cannot ask is "where did the money come from?"

One of the things which Frank Oliver could do, if he would, is tell where the money did come from.

No investigation which does not discover where the money did come from can possibly be made to look like a satisfactory investigation, and no whitewash which the committee may bring in leaving this question unanswered can possibly be made to remove the doubt from the public mind so long as Frank Oliver has the opportunity himself to answer the question and fails to do so.

Frank Oliver does not need to tell where the money came from. He has the privilege, if he chooses to do so, to go on the defensive. But this is a free country and no citizen, no matter what his party leanings, is compelled to support a man who would sooner be on the defensive than take advantage of an opportunity to explain himself.

Frank Oliver can suit himself about it. So can the electors.

Hydro Electric Gives Toronto Cheaper Light

With the new hydro-electric, Toronto claims to be the best-lighted city in the world, and if light in Toronto is not the cheapest in the world, it must be very nearly the cheapest, so far as the average householder is concerned.

During the fight to get the hydro-electric into Toronto the municipal-ownership proposition met the orthodox opposition. It was confiscation of the rights of the company already established; the city already had all the business it could attend to; the city could not handle an undertaking so large; etc., etc.

When the hydro-electric was turned on the other day, it made a new room which is based on a charge of ten cents per month for each room lighted and three cents per kilowatt hour for "juice" used. Figured out in currency, this means that if a householder in a nine-roomed house uses 60 kilowatts in a month, it will cost \$2.70.

Previous to the arrival of the hydro-electric, the Toronto Electric Co. was charging 8 cents per kilowatt hour and a meter rent of 25 cents a month, exactly the same rate, incidentally, as is in force in Edmonton. On this basis 60 kilowatts from the company would cost \$5.05.

From MacKenzie and Mann's point of view, this may be taken to prove what they have all along been contending, that government ownership of electric enterprises practically ruins their franchise, but from the householders' point of view it will be sufficient evidence that handing over a franchise to a company on any grounds whatever is pretty expensive for the consumer—which means yourself.

Not Getting Their Share of The Prosperity

In the Fernie investigation a miner who was evidently put on the stand to show how good wages were, testified that he earned \$1,040 a year at his trade, which is an average of \$20 a week. The man said he was an old employee and a skilled workman and admitted that for that reason he was especially favored.

It will be remembered that the operators in the Crow wanted the investigation behind closed doors. With \$20 a week the top wages a man can get in Fernie, where living is about as high as anywhere in Canada, it is not surprising that the operators were willing to conduct the investigation with as little publicity as possible.

Undoubtedly there is foundation for what the miners down in the Pass have been claiming all along, that they were not getting their share of the country's prosperity.

City Already Has Need Of A City Hall

Mayor Armstrong's proposal to commence the new city hall this year is one which should not be lost sight of in the municipal tangle which is now occupying the attention of the aldermen and commissioners.

Edmonton has been doing business for years in a number of buildings which are, to say the least of them, inadequate, and the policy for the past five years has been to add another section or another building when the buildings already occupied become too crowded, with the final result that the city's business is scattered about in such a way that the ratepayer who desires to pay his water and light rates and dog tax has to find three different offices in three different buildings to settle the score.

The new city hall is needed already, and long before it can be completed the city's business will suffer severely from lack of proper office accommodation.

The city has the finest city hall site in the west and the city has the money and the inclination to build. The time to commence on the plans is now.

Twelve million dollars in dividends should be distributed by the Edmonton Portland Cement Company, among its shareholders in the next twenty years.

The stock of the Company should increase in value six million dollars in the next five years.

Let us distribute these dividends among the people of Edmonton and add this great increase in values to the fortunes of the citizens of this community.

ARTICLE NUMBER SIX

On Monday of next week the public will be invited to subscribe for the shares of the Edmonton Portland Cement Company. The series of articles which have been daily published in all of the Edmonton newspapers, has undertaken to make clear to the public two facts:

1. The importance and profits of the Portland Cement Industry, and
2. The great value of the properties owned by the Edmonton Portland Cement Company.

This article is a brief resume of what has already been said, together with a statement of WHY this proposition has been offered to the public, instead of financed in the manner usually adopted for such great enterprises.

As has been fully set out hitherto, this is the era of construction in the history of the world. Organization is the shibboleth of today. Its expression is the vast structures that are being raised up everywhere—the material monuments to the vision, courage, genius and determination of this generation. And the building material of the twentieth century is not the stone hewn from the mountain side, but the stone made by the hand of man—CONCRETE. The future demand for Portland Cement from which concrete is manufactured, will only be measured by the magnitude of the construction undertakings of the next generation, which one authority has prophesied will exceed all the building on the face of the earth today.

The Coming Canada Market

Canada alone affords a market for a hundred such cement mills as is now proposed for the Edmonton Portland Cement Company. Here is a great empire capable of sustaining in comfort and abundance a hundred million people, but there are less than ten million within its borders today. If there is a land on earth of which the vision of an American poet could be fitly spoken it is Canada:

"Rudiments of empire here, plastic yet and warm,
Chaos of a mighty world, rounding into form."

One does not need the vision of a prophet to look beyond to the not far distant day when a network of railroads and beautiful highways will unite in one great homeland, a nation that is gathering here from every quarter of the earth—when home will be joined to home from the Rocky Mountains on the West to the land of the Acadians in the East—and when the world-wide signal of progress "the light in the window," will tell the story of homes that have joined hands and hearts across a continent.

This is not a vision merely. It is a fact stayed not in the sordid expressions of trade, but told in the terms of life. For finally, the sum of all effort is expressed in what a people build.

Monuments are not fortuitous, they are the history which every nation writes for itself. There is the fortress on the outpost of endeavor wherein a man may labor. Whether it be shop or store or mill or counting-house, it is the expression of his ambition, and beyond it lies his hopes. And then there is the castle well within the battle lines—his home—that which expresses his ideals. And the way he builds these things tells the manner of man he was. The building of the twentieth century tells of its builders the twofold story of genius and vision; of genius because the materials of which they build were made by the hand of man and of vision because these buildings are lifted up to remain.

This great home building era is now dawning. Already the "far flung battle line" has been swung westward from the Atlantic shores to the far away seas on the West. Concrete, that material which has kept step with the building of the world, is again recruited into the battle lines of progress as never before in all time. And the manufacture of Portland Cement is the industrial enterprise which today, more than ever before is making history.

These are the big reasons why the production of Portland Cement has increased twenty-two thousand per cent. in twenty years; and why in the next ten years it will increase from 74,000,000 barrels annually to 200,000,000 barrels annually. . . .

The Great Advantage of the Edmonton Plant

As has already been explained, the fact that the Edmonton Portland Cement Company has BOTH of the materials necessary for Cement manufacture, in their most accessible forms and in unlimited abundance, gives to this company the most certain future of prosperity of any cement plant in Canada, or the United States. The materials from which the carbonate of lime and silica necessary for cement manufacture are derived marl or lime-rock and clay, shale or slate, have no geographical association and are only found near together by mere chance.

So great has been the demand for Portland Cement that practically the whole American Continent has been prospected, and the known joint deposits have all been utilized long ago. Cement plants are now being located where ONE of the materials can be found and the other is shipped to the mills. Many plants are located solely with reference to distribution and BOTH the materials are shipped to the mill. All this increases the cost of production and advances the market price of Portland Cement.

The Edmonton Portland Cement Company, with deposits of marl and clay sufficient for the manufacture of at least 12,500,000 barrels of cement, and no one knows how much more, can produce cement AT THE MINIMUM COST OF MANUFACTURE and sell its output at the market price FIXED BY ITS COMPETITORS. This plan should manufacture cement under present conditions at a profit of \$2.00 per barrel. Only the future will determine how much GREATER its profits may become.

Wall Street or Edmonton. Which?

There were two ways by which the Edmonton Portland Cement Company might have been financed, one was by underwriting the stock through the great financial interests of the East. This is the way such flotations are usually digested. And Wall Street or Lombard Street would have been glad enough of the opportunity. The great trusts on both sides of the International Line would have been glad enough to get this plant.

But the situation is just this: The Edmonton Portland Cement Company will have a net earning capacity of at least \$600,000. Its dividends in the next twenty years should amount to at least \$12,000,000, and no one knows how much more. There is going to be an enormous increase in values in this institution. Its stock which has today a par value of \$1,500,000 should be worth \$3,000,000 in two years and \$7,500,000 in five years.

Now is there any reason under the sun why this great increase in values and these splendid dividends should go to further strengthen the "strangle hold" which the great "interests" now have on the industries of this nation? If there is a reason it is only this: That the people of Edmonton will not open their eyes to what is under their very noses, and will insist upon "raising cabbages on a gold mine."

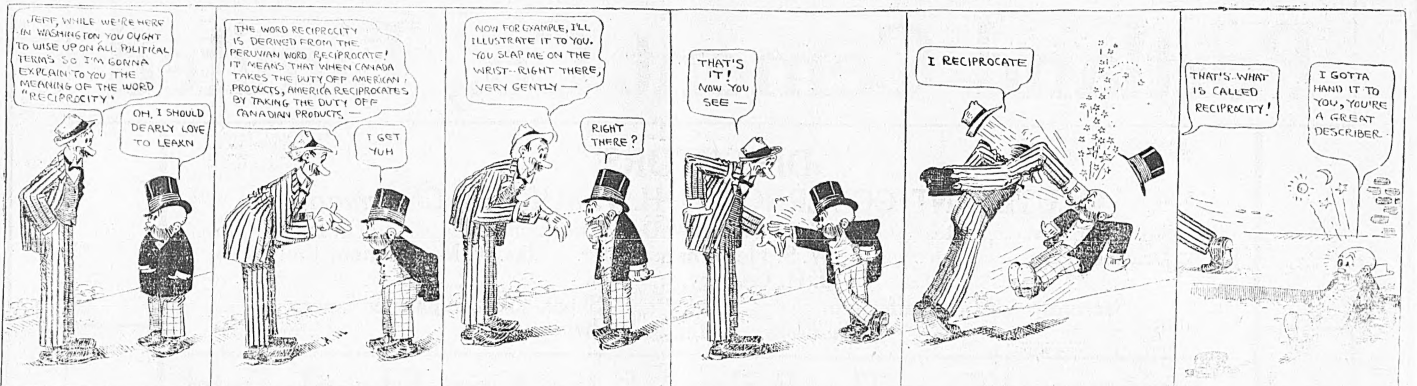

One of the most prominent bankers of Edmonton gave it as his opinion that there is an abundance of idle capital in the city of Edmonton to finance this institution. That decided the matter. If there is \$900,000 of idle capital in this city, AND THERE IS, there is no reason under the sun why every share of the stock in this Company should not be kept right here: the earnings of this great institution, fifty thousand dollars a month, distributed among the people of this city; and this great increase in values, six million dollars, added to the fortunes of its citizens.

ST. GEORGES PLAY DRAW WITH N'W'D

FIRST SCORELESS MATCH OF THE SEASON PLAYED ON SWIFT'S GROUNDS LAST NIGHT.

A scoreless tie was the result of the St.

Georges' team, who played out on

Swift's grounds last night. The game was

the fastest closest and hardest played

match this season. There was a large

crowd of football fans throughout the

game they were kept on their toes.

The Englishmen played aggressively but

sturdy hard work by the Norwood lads

held them out of the nets. The St. Georges

made a couple of occasions had the pick-

up between the posts but brilliant

work by the goalkeepers saved the day.

Near the start of the second half Nor-

wood had a great chance to score as the

result of a corner kick but failed to se-

ize it.

The race will be on at 4:30 o'clock and

will be with two miles straightaway.

The start will be at the country club in West

Springfield and the finish at the north end

bridge. Robert Barker, an old cricketer

and chairman of the Harvard row-

ing committee, will referee the contest.

The first practice spins of the two crews

were taken yesterday and were witnessed

by hundreds of spectators who lined the

river banks.

REAL ESTATE BULLETIN

Owing to the holiday being partially observed, business was somewhat slack in real estate circles yesterday, good residential lots for immediate use, in the West End, being in principal demand, with some East End business property and cottages.

This being Saturday, we do not expect the market to assume its normal tone until Monday.

ALBERTA PARK

We are making daily trips to this property and shall be pleased to have you arrange with us either personally or by phone to accompany us to the Park and see just what it is we have been talking about—and if it does not commend itself to you, you will not be asked to buy.

Our phone is No. 1850.

Not a Day Passes

but someone sells a piece of Edmonton Real Estate at a large figure, bought only a few years previous at a very small price.

In many instances this one piece of property has made them more than they have been able to save from their business or wages in years.

Are you Willing

to be one of these fortunate ones? The same opportunities are being offered today, with a greater assurance of profit than any of those deals made in the past, for the reason that Edmonton is now sufficiently established to warrant any industry or corporation locating here.

G. T. P. Addition

has many advantages over many of the propositions offered today, because it is favorably situated in the vicinity of what will be the largest pay-roll district in the city and near the property purchased by the city for factory sites.

This Property is High & Dry

the prices are very cheap

\$90
to
\$200
per Lot

and the terms easy—\$10.00 cash and the balance \$5.00 per month, with extension of time in case of sickness and a free transfer to the heir in case of death of the purchaser.

Come in and let us tell you more about this property.

Canadian Investment Co., Ltd.
